RE: MAXADAPTOR® Maximum Temperature Tolerance

This document certifies that MAXADAPTOR® Couplings distributed by Gripper Gasket LLC have a maximum temperature tolerance of **250° Fahrenheit**.

These couplings are manufactured using AISI 304 stainless steel components, a high impact polyimide (nylon) securing cage, and an injection molded EPDM rubber gasket.

Please feel free to contact me should you have any questions.

Best regards,

A handwritten signature in blue ink, appearing to read 'Chris Vansell', is written over a light blue circular stamp.
